

ZECURION NEXT GENERATION DLP

Know more. Risk less.

ZECURION DATA LOSS PREVENTION

Provides a 360° view of all processes, associated with employees.

According to the Global Study on Occupational Fraud and Abuse (ACFE, 2020) organizations lose up to **5%** of annual revenue due to internal fraud. Typical fraud case lasts **14** months before detection and leads to a **\$1,509,000** average loss per case.

Facilitated by modular architecture, Zecurion Next Generation DLP allows you to create your perfect cybersecurity blend for ultimate control.

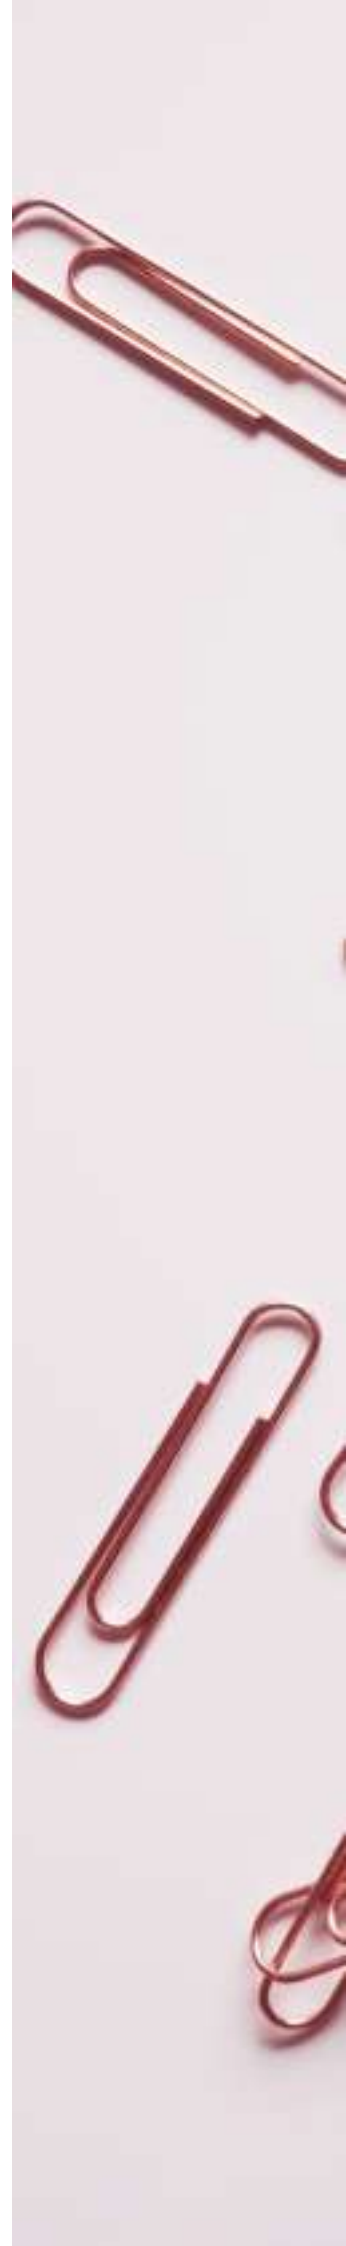

EASY-TO-DEPLOY AND EASY-TO- MANAGE FROM A SINGLE CONSOLE

BENEFITS

- **Elimination of internal fraud** and associated damage
- Comprehensive **protection for 10 to 200,000 users**
- Support and **enhancement of staff productivity**
- **People-centric** instead of data-centric approach
- **Protection** of intellectual property
- **Safety** of personal and financial data
- **Improvement** of organization's cybersecurity posture
- **Money loss prevention**

KEY FEATURES

- Provides **13 deployment options** to fit the solution into the IT infrastructure of any specific company.
- Utilizes **10** content detection techniques to provide **comprehensive data loss prevention**.
- **Protects against data leaks** by more than **100** channels, recognizes over **500 file formats**.
- **Controls over 250 different internet services**, including LinkedIn, Facebook, Google+, Yahoo, messengers, webmail, and file hosting.
- Supports **voice interception and file transfer capture** over all messengers including WhatsApp, Telegram, Skype, and Microsoft Teams.
- Provides complete **archiving of all data seen by endpoint agents** and captures screenshots and other end-user screen activities.
- **Includes a User Behavior Analytics (UBA) module** with fast risk-based user assessment, emotional profiling and behavioral profiles.
- **Offers unique features** such as Screen Photo Protection, Screen Watermarks, and others.
- **Ensures simplicity of investigations** and **shortens the incident response cycle** with its proprietary Investigation Module and diverse range of fine-tunable reports.

MORE THAN A DATA LOSS PREVENTION

UBA with Fast Risk-Based Assessment ensures total visibility of employee activity and evaluates it on main parameters: risk, productivity, policies, and emotional state. Each employee profile contains all events associated with the user on a single page. All events are shown in chronological order and are clickable for more information. The Security Officer will supervise high-risk employees, while low-risk ones will operate with more minor limitations.

Screen Photo Detector. Whenever someone tries to photograph a screen by smartphone, Zecurion DLP immediately detects it via webcam and blocks the computer. The technology uses 2 neural networks to ensure reliable smartphone detection and flags cybersecurity incidents in a blink of an eye (from 0.06 seconds).

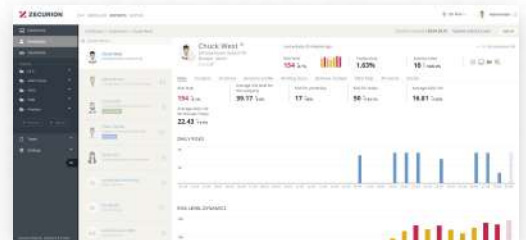

Investigation Workflow Automation. This module simplifies investigations and shortens the incident response cycle. It minimizes the cybersecurity team workload by providing an ultimate view of actual tasks with all the statuses, data on the investigation stage, executants, and deadlines. During the investigation, cybersecurity team members can leave comments on the task, discuss progress with other participants (from CISO to analyst), and attach documents and incidents as proof.

Zecurion Staff Control keeps track of working hours, logs employees' actions at workplaces, and evaluates the efficiency. The module checks the activities of personnel for compliance with corporate standards and safety policies and helps optimizing the company's business processes.

IMPRESSIVE USER-FRIENDLY INTERFACE

RECOGNIZED EXPERTISE

- Founded in **2001**, on DLP market since **2005**
- **150+** business partners worldwide
- Present in **70+** countries
- **30+** product awards
- Recognized by "Big 3": **Gartner, Forrester, IDC**
- **5 stars out of 5** from customers at **Gartner Peer Insights**

FRIENDLY AND FLEXIBLE

- All requests are taken directly by our **L2 support engineers**
- We speak **your language**
- Flexible pricing policy and **individual approach**
- Instant support **by phone or chat**
- Ticket response via email within **2 hours, 24/7 Premium support**
